

Overview

Leaves System is a comprehensive web-based platform designed to simplify and automate the management of employee leave requests within organizations. It provides an intuitive interface for employees to submit leave applications, and view approval statuses and view chart statistics Approved or Rejected.

The system empowers managers teams with efficient tools to review, approve, or reject requests, ensuring full visibility over team availability.

Roles & Permissions

The system allows users to register and create their personal accounts by entering their information and selecting their role within the organization — either as an Employee or a Manager.

During registration, each user's credentials are securely stored and used for future authentication.

A computer monitor displays a 'Create Account' web form. The form is titled 'Create Account' at the top. It contains several input fields: 'FirstName' (placeholder 'First Name'), 'LastName' (placeholder 'Last Name'), 'Email' (placeholder 'Email'), and 'Password' (placeholder 'Password'). Below these is a 'Role' dropdown menu with 'Employee' selected. A blue 'Register' button is at the bottom of the form. A link '[Already have an account? Login](#)' is positioned below the button. To the left of the form is a colorful illustration of a person in a blue shirt and brown pants standing next to a desk with a calendar, a potted plant, and a smartphone showing a calendar app.

01 The system allows the user to enter their personal information when creating the account, including their first and last name and the email address used as a means of logging into the system, as well as entering a secure password to protect the account.

A computer monitor displaying a registration form. The form is divided into two columns by a vertical line. The left column contains four input fields, each with a label above it: 'FirstName' (placeholder: 'First Name'), 'LastName' (placeholder: 'Last Name'), 'Email' (placeholder: 'Email'), and 'Password' (placeholder: 'Password'). The right column is empty.

02 The user can also specify their role in the system during the registration process, whether they are an employee or a manager, so that after logging in they are directed to the interface designated according to their permissions.

The left column contains a 'Role' dropdown menu with 'Employee' selected and a blue 'Register' button. Below the button is a link that says 'Already have an account? Login'. The right column is empty.

Roles & Permissions

Once logged in, the system automatically redirects the user to the appropriate dashboard based on their assigned role.

Employees can submit and track their leave requests.

Managers can review, approve, or reject requests from their team members.

This role-based access ensures that every user only interacts with the functions relevant to their position, enhancing both security and workflow efficiency.

01 On the login page, the user enters their email and password.
After verification, the system redirects them to the appropriate page based on their role — employee or manager.

A computer monitor displaying a login interface. The interface has a white background with a thin black border. At the top left, the word 'Login' is written in a bold, black, sans-serif font. Below it, there are two input fields. The first is labeled 'Email' and contains the placeholder text 'Email Address'. The second is labeled 'Password' and contains the placeholder text 'Password'. Below these fields is a solid blue button with the word 'Login' in white. At the bottom of the form, there is a blue hyperlink that reads 'Create new account'.

Dashboard Employee

The Employee Dashboard is divided into two main sections:

1. Leave Table
2. Leave Chart

Dashboard

Employee

Leave Table

Displays all leave requests submitted by the employee, with the ability to track their status — Pending, Approved, or Rejected.

Employees can delete a leave request if its status is Pending.

The table also includes filtering options, allowing employees to quickly view requests based on status, date, or type of leave.

Dashboard

Employee

Leave Chart

Shows a visual representation of the number of leave requests that have been approved versus those that have been rejected, providing the employee with a clear overview of their leave history.

Take A Leave Employee

On the Take a Leave page, employees can submit a new leave request by specifying:

- Start Date
- End Date
- Reason for the leave

Once submitted, the request will be sent for approval and tracked in the Leave Table on the Employee Dashboard

The screenshot shows a web application interface for submitting a leave request. The browser's address bar displays 'System Leaves Take A Leave'. The top right corner of the page shows a welcome message: 'Welcome, Omar Moham'. The main content area features a form titled 'Take a Leave'. The form includes three input fields: 'StartDate' with the value '11/04/2025', 'EndDate' with the value '11/05/2025', and 'Reason' which is currently empty. Each date field has a calendar icon to its right. Below the 'Reason' field is a blue 'Submit' button.

Dashboard Manager

The Manager Dashboard displays a table of all leave requests submitted by employees, including requests that have been approved or rejected previously.

Managers can update pending leave requests by either approving or rejecting them.

The table also includes filtering and search functionality, allowing managers to quickly find requests by employee name or other criteria.
